

TeleCheck® Electronic Check Acceptance® (ECA®) Verification Service

The TeleCheck® Electronic Check Acceptance® (ECA®) Verification service gives merchants an efficient option for accepting checks at the point-of-sale. This service is ideal for merchants who want to implement an electronic check service to avoid traditional bank fees and manage their own collection efforts.

The Challenge

Customers want payment options, so merchants need to accept and process checks. Paper checks create a number of extra steps for the merchant and can be a cost burden. They represent higher risk for fraud. They need to be verified, reconciled, physically taken to a bank for deposit and processed. In addition to waiting several days for funds, merchants have to pay various fees to their banks for processing.

The Solution

The TeleCheck® ECA® Verification service is one of the industry's most sophisticated check verification systems. It gives you the confidence to accept more checks while reducing bank fees and processing costs. Utilizing the TeleCheck ECA Verification service, you will see an improvement in cash flow with faster funding. And with electronic check processing, you return the check to customers, helping to protect their personal information. The TeleCheck ECA Verification service screens checks against information from hundreds of thousands of businesses and financial institutions, minimizing the risks associated with check acceptance.

The TeleCheck ECA Verification solution helps you improve operational efficiencies and reduce losses from returned checks. Merchants also experience expedited closing, balancing and settlement after implementing this service.

Here's How It Works

After a customer gives you a paper check, TeleCheck uses leading risk assessment technology and extensive check-writer negative and activity databases to evaluate the risk of accepting a check. If the check meets the verification requirements, the TeleCheck ECA Verification service converts the paper check into an electronic transaction at the point-of-sale. The Automated Clearing House (ACH) network is used to process the transaction and funds are deposited directly into your bank account generally in two business days.

TeleCheck® Electronic Check Acceptance® (ECA®) Verification Service

Help Your Business

- Make fewer trips to the bank
- Reduce bank fees and processing costs
- Improve cash flow
- Streamline back-office operations
- Reduce the risk of lost, stolen or damaged checks
